PROFILE

I am a Full Stack Web Developer with a keen interest in UI/UX. I have worked in the medical and recreational cannabis industry since 2016. I owned my own recreational grow from 2017-2018. Before that I worked in the restaurant industry for 10 or so years, and worked administrative positions in a couple of different places. In late 2018, life happened and I became a stay home mom. Coming from these industries and positions, I have team management experience, customer service skills, meticulous attention to detail, and creative problem solving skills.. I am driven, an ambitious forward thinker that learns and evolves quickly and will be an asset to your team. Now armed with skills in mobile first web design, HTML, CSS, JavaScript, Node.js, and jQuery, I am ready to utilize all of my skills in an exciting new Web Development position.

PROJECTS

WHAT'S FOR DINNER

https://cynthiwu.github.io/whats-for-dinner/

Web based application that generates recipe ideas based on users input of ingredients. Designed with mobile users in mind it also allows many options for the user to tailor to their needs.

DAY PLANNER

https://aswartz14.github.io/DayPlanner/

Web based application designed mobile first that keeps track of your daily tasks dynamically updated time block color to indicate past, present, or future tasks.

WEATHER DASHBOARD

https://aswartz14.github.io/WeatherDashboard/

Mobile first web based application for users to track weather of desired locations, stores multiple locations in local storage and shows a five day forecast.
